

Cyclone-Vac

UTILITY

Excavator

Patented

Lynn A. Buckner
423.413.7823

U.S. Patent # 7,644,523 & 7,604,023 &
7,503,134 & 6,988,568 & 6,453,584
Pending App. # 61/277,201 & 12/592,142 &
12/653,871 & 11/809,957 & 12/584,441
& 10/810,908 & 10/624,868

Model 550 & Model 850

Experience the Advantages:

- Only 16'-6" Long X 88" Wide & 7'4" Low Profile
- Air filters are self cleaning by vibration
- Filter housing has an easy access rear door for filter washing
- Clean, non-cluttered appearance with a user friendly design
- The Unique design allows the vacuum tank to function as a cyclone filter
- Thus, less solids leave the vacuum tank & enter the filter
- This promotes a longer air filter life
- Has a Large Vacuum door for unloading
- The Rear door is powered & remotely operated
- Vac door also has a Powered solids unloading drag bar
- All options have a user friendly mounting location
- The vacuum hose wand has a Non Clogging design
- The trailer has two 7,000 lb. torsion axels
- Option of using large on & off road tundra turf tires

The Cyclone-Vac models also have the option of adding:

1. A 100' Vacuum hose reel;
2. A 250' powered water hose reel;
3. A 250' 10gpm 3,000psi jetter with a powered hose reel;
4. Auxiliary hydraulics with 30' retractable hose reel;
5. A Hyd driven Jack hammer & 300 GPM submersible water pump;
6. An Air compressor and retractable hose reel
7. A 240V, 8,000W generator
8. Engine enclosure with a sound reduction package.
9. 36"X 20"X 20" aluminum tool chest
10. Choice of 500 CFM or 800 CFM vacuum
11. Choice of 30hp or 38hp Kohler gas or 49Hp Diesel engine
12. Choice of 4.7 gpm @ 3,500psi, or 10 gpm @ 3,000psi
